## Siphoning confidence: Piracy and fuel theft

By DIAN GRAHAM  
FOR THE STRAITS TIMES

**A** STATISTICAL increase in the number of attacks on shipping has led to concerns that piracy is on the rise in and around South-east Asia.

The figures, for the first half of this year, were reported by the Regional Cooperation Agreement on Combating Piracy and Armed Robbery against Ships in Asia (ReCAAP), and compiled by the Asia and Pacific Maritime Security Centre.

ReCAAP's inter-governmental, bi-lateral, sharing, Centre (ISC) reported a year-on-year "surge" in first-half incidents, from 61 last year to 90 this year, but none of these involved piracy.

ReCAAP's third-quarter report reveals a marked overall improvement since July incidents dropped to 36 from 70 in the April-June period. The number of attacks in Indonesian ports and surrounding seas continued to fall throughout this year.

Such a decline is welcome, but it is not enough to put this in perspective - since 2011, a total of 18 siphoning attacks have been reported, of which 11 were successful.

When siphoning attacks occur at night, well outside Singapore's port limits, siphoning in the open waters south of Indonesia's Sumatra island, small private tugs have been used to intercept tankers.

When siphoning attacks occur at night, well outside Singapore's port limits, siphoning in the open waters south of Indonesia's Sumatra island, small private tugs have been used to intercept tankers.

attacks cannot be ruled out," Singapore's ReCAAP ISC has said, as a "surge" for insurance fund have mounted as some operators before from profitability in the statistics. Targeted siphoning attacks, with strong indications of financial involvement, do not pose a potential threat to shipping or the energy trade, although it lacks do still seem on vulnerable vessel types elsewhere within the basin of Indonesia's Sumatra island. Product tanker are at higher risk, with siphoning incidents continuing to occur to go by in a number of weeks. Supply demand market factors return this risk. The year

ReCAAP's inter-governmental Information Sharing Centre reported a year-on-year "surge" in first-half incidents, from 61 last year to 90 this year, but many of these involved piracy. # "INTERPOL's beefed-up regional presence in Singapore could play a useful role by galvanizing maritime law enforcement cooperation."

The Straits Times dated 24 November 2014

## CAPACITY BUILDING AND TRAINING

## INTERPOL Capacity Building Programme to Foster Maritime Security in Malaysia

### Phase 1

- 2 x 1-week Basic Trainings

### Phase 2

- 1-week Advanced Training
- 1-week Train-the-Trainer
- Equipment

### Phase 3

- Operation

## INTERPOL Capacity Building Programme to Foster Maritime Security in Malaysia

### Training Modules

INTERPOL's tools and services, International Maritime Law, Interviewing techniques, Forensics, IEDs

### Interagency Approach

- MMEA
- Malaysia Marine Police
- Royal Malaysia Navy
- Marine Department
- NCB Kuala Lumpur

Government  
of Canada

Gouvernement  
du Canada

انتبـاهكم على الشكر جزیل نشـكرکم
