

Ballast Water Management Plan

CONTENTS

Section	
1	Introduction
	1.1 General
	1.2 Objective
	1.3 Scope
	1.4 Purpose
	1.5 Responsibility
	1.6 Revision
	1.7 Exemption
2	Definition
	2.1 Definition
3	Ship's Particular and System
	3.1 Ship's Brief Description
	3.2 Ballast Tanks Capacity and system
4	Ballast Water Sampling
	4.1 General
	4.2 Master's Obligation and Authority
	4.3 Port State
5	Ballast Exchange Procedures
	5.1 General
	5.2 Preparation for Ballast Water Exchange
	5.3 Sequential method
	5.4 Flow Through method
	5.5 Ballast Water Treatment System
	5.6 Precautionary Practices
6	Safety Procedures
	6.1 General Precaution
	6.2 Exchange at sea – Precautions
	6.3 Sequential method – Precautions
	6.4 Flow through method - Precautions
	6.5 Precautionary advice for exchange operations
7	Operational and Safety Restrictions

Ballast Water Management Plan

	7.1	General
	7.2	Procedures for safe tank entry
8	Ballast Water Management Methods	
	8.1	Ballast Exchange Plan
9	Sediment control and disposal	
	9.1	General
10	Communication	
	10.1	General
	10.2	Coastal State Discharge Procedure
11	Role and Responsibility	
	11.1	Role and Responsibility of Master
	11.2	Role and Responsibility of Environmental Officer
12	Reporting Requirement	
	12.1	Reporting
	12.2	Retention of record
13	Training and Familiarisation	
	13.1	Training
	13.2	Training Scope
14	Heavy Ballast Operation	
	14.1	Procedure

Appendices	
Appendix I	National and Local Requirements
Appendix II	Normative Reference
Appendix III	Ballast Water Exchange Plan - Sample
Appendix IV	Stability Information
Appendix V	Flow Through Ballast Exchange Record
Appendix VI	Reporting Form and Book - Office
Appendix VII	Reporting Form - Port States
Appendix VIII	Ballast Water Management Training Record
Appendix IX	WMO Definition of sea state
Appendix X	Water Ballast Tank Arrangement and Sampling point
Appendix XI	Ship's Plan
